5.4 Location

Notwithstanding the yard and setback provisions of this By-law to the contrary uncovered surface parking areas, in other than residential use areas, shall be permitted in any required yard or in the area between the road or street line and the required setback provided no part of any parking area, other than a driveway, is located closer than 1 metre to any road or street line.

5.8 Drive Through

The entrance for a drive through function must provide for the progressive movement of cars and shall be sufficient to accommodate stacking for not less than 10 cars on said lot, starting at the last window, and that the drive through function does not inhibit the use of the necessary required parking spaces.
